

One Wrong Move MVP Build Report

Generated on May 2, 2026 for the local project at `/Users/kevinhegg/Desktop/one-wrong-move`.

Summary

Built the first playable MVP of One Wrong Move as a dependency-free static browser game in `/public`.

The game shows a deterministic daily 5x5 puzzle based on YYYY-MM-DD, runs three rounds, disables input during preview, tracks elapsed time and mistakes, scores the result, and generates share text with clipboard fallback.

Created Netlify configuration with `public` as the publish directory and no build command. The game works by opening `public/index.html` directly in a browser.

Files Created Or Changed

- `README.md`
 - `netlify.toml`
 - `public/index.html`
 - `public/style.css`
 - `public/game.js`
 - `docs/codex-reports/screenshots/01-start-screen.png`
 - `docs/codex-reports/screenshots/02-preview-phase.png`
 - `docs/codex-reports/screenshots/03-active-puzzle-phase.png`
 - `docs/codex-reports/screenshots/04-completed-share-screen.png`
 - `docs/codex-reports/001-mvp-build-report.pdf`
-

Local Run Instructions

- Open `public/index.html` directly in a browser.
 - Optional local server: `python3 -m http.server 8080 --directory public`, then visit `http://localhost:8080`.
-

Netlify Deploy Settings

- Build command: leave blank
 - Publish directory: `public`
-

Verification

- Initial repo guardrails passed: `package.json` present, Git repo on main, clean status, and no nested `one-wrong-move/.git` folder.
 - Ran `node --check public/game.js` successfully.
 - Opened `public/index.html` directly in a browser and found no app console errors.
 - Captured start, preview, active puzzle, and completed/share screens into `docs/codex-reports/screenshots/`.
-

Review, Commit, And Push Commands

```
git status --short
git diff -- README.md netlify.toml public/index.html public/style.css public/game.js
```

```
open public/index.html  
git add README.md netlify.toml public docs/codex-reports  
git commit -m "Build One Wrong Move MVP"  
git push origin main
```
