

One Wrong Move Mechanics Redesign Report

Generated on May 2, 2026 for `/Users/kevinhegg/Desktop/one-wrong-move`.

Final Response Summary

Redesigned One Wrong Move from a memory mutation test into a clear rule-violation puzzle.

Each round now presents one board, one visible rule, and one objectively unique wrong move.

Rebuilt the UI as a mobile-first phone app shell with a compact header, rule card, touch-friendly board, mistake feedback, gated round advancement, scoring, and share text.

Files Created Or Changed

- `public/index.html`
 - `public/style.css`
 - `public/game.js`
 - `README.md`
 - `docs/game-design.md`
 - `docs/codex-reports/002-mechanics-redesign-report.pdf`

-

Design Rationale

- The original preview-and-mutate loop made players rely on memory instead of reasoning.
 - The new design keeps all information on the active board so the answer can be justified from the visible rule.
 - A constrained phone frame on desktop protects the intended mobile pacing and prevents wide, loose layouts.
-

New Play Mechanics

- Round 1: Stray Tile. A clean diagonal has exactly one extra dark tile outside it.
 - Round 2: Bad Copy. The left model is mirrored on the right, with exactly one right-side mismatch.
 - Round 3: Illegal Move. A numbered path has exactly one first jump that is not orthogonally adjacent to the previous number.
-

Local Run Instructions

- Open `public/index.html` directly in a browser.
- Or run: `python3 -m http.server 8080 -d public`, then visit `http://localhost:8080`.

Netlify Deploy Settings

- Build command: leave blank
 - Publish directory: `public`
-

Verification Checklist

- Confirmed package.json exists, this is a Git repo, current branch is mechanics-redesign, required public files exist, and no nested one-wrong-move/.git folder exists.
 - Ran `node --check public/game.js`.
 - Opened `public/index.html` directly in the browser with no console errors.
 - Ran `python3 -m http.server 8080 -d public` and loaded `/index.html` with HTTP 200.
 - Validated generated daily puzzles: Round 1 has one stray tile, Round 2 has one right-side mismatch, and Round 3 has one first illegal move.
 - Verified wrong taps increment mistakes and show a hint.
 - Verified correct taps show explanation and require the explicit next action.
 - Verified completion after three rounds, scoring, and share text.
-

Inspect, Commit, And Push Commands

```
git status --short
git diff -- public/index.html public/style.css public/game.js README.md docs/game-design.md
open public/index.html
open docs/codex-reports/002-mechanics-redesign-report.pdf
git add public/index.html public/style.css public/game.js README.md docs/game-design.md
docs/codex-reports/002-mechanics-redesign-report.pdf docs/codex-reports/screenshots/002-*.png
git commit -m "Redesign One Wrong Move mechanics"
git push origin mechanics-redesign
```
